MARVEL NEXT

Marvel Next opens a new chapter in the Marvel Collection and transforms the way marble effects are incorporated into a wide variety of designs.

The veining becomes more subtle and the colour shading is more dispersed so the material can be used to cover larger spaces without overwhelming them.

Each finish alters the relationship with light and the tactile response. The Matt surfaces absorb, Silk softens the effect, Polished reflects and the Hammered finish breaks-up and diffuses light.

The designer controls the intensity as neutral tones on large surfaces bring a sense of calm, accents and colours create focal points, and reliefs and decorations deliver detail.

This same aesthetic runs through walls and floors, and from inside to outdoors, bringing continuity and cohesion.

Please read on to explore this simply stunning series in fine porcelain, harnessing the height of technological advancement, with a fresh take on a timeless architectural material.
