

minoli

Core Essentials

THE SURFACE WITHIN™

minoli

Our 2017/18 Core Essentials range remains true to its founding brief of offering 'value without compromise'. Working closely in partnership with some of the world's leading manufacturers, we have now built up an unbeatable collection of better value ranges so you can create stunning, high quality cutting edge and classic finishes, without blowing the budget.

You can find out more about Minoli and our products on our website www.minoli.co.uk or come and see us in person at our purpose-built showrooms. Because we pride ourselves on our ability to deliver, the vast majority of our ranges are available from our extensive warehouse stocks for rapid delivery.

THE ENVIRONMENT

WE BELIEVE

Environmental issues have profound effects on the living conditions of people worldwide. The water shortage in many parts of the world, cross-border pollution and rising sea levels are just a few of the challenges facing our global population.

We strongly believe that through more responsible choices, customers, companies and institutions can orientate the market more and more towards the affirmation of products and services with a reduced environmental impact.

WHAT WE DO

- Sourcing from reputable companies who take environmental concerns seriously
- Active policy to reduce “tile miles” by using bulk container shipments, on trains and direct services where appropriate and possible
- Recent upgrade to larger capacity and more fuel efficient vehicles, which has reduced our fleet size and increased efficiency
- Our fleet is “tracked” by satellite. Although this was introduced for service reasons, it has produced savings in fuel due to a reduction in miles travelled by drivers who need to operate efficiently
- Active internal recycling policy, including the recycling of “scrap” tiles from obsolete stocks and breakages, reducing local emissions
- Predominantly electric powered internal moving equipment
- Modern efficient warehousing. Our buildings are relatively new, built to the latest British building regulations
- Encourage communications predominantly by email, both internal and external, to reduce unnecessary print
- Using paper supplies with maximum available recycled content.
