

The background of the entire image is a high-resolution photograph of a marble surface, featuring a complex pattern of veins in shades of grey, black, and white. Overlaid on this background is a large, vertical white rectangle that serves as a container for the text.

PLEASE NOTE

This literature is intended as a guide only, print cannot reproduce a true likeness of colour, tone or texture.

Reference to a sample is essential.

COLOURED BODY PORCELAIN STONEWARE

The random mixing of atomised and micronised powders creates aesthetic effects in the ceramic body, further enhanced by surface applications protected by transparent crystalline.

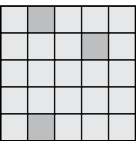

Their attractive appearance and technical performances make these products suitable for residential and light commercial use.

LIKE MARBLE, EXCEEDING MARBLE...

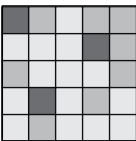

- Stain and scratch resistant - Resistant to chemicals, non-porous and resistant to acids
- High load strength - Resistant to loads, compression and bending (Subject to correct installation)
- Unalterable over time - Colour and brightness do not change over time

COLOUR SHADING

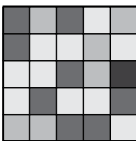

The V-Shade classification (V1-4) indicates the range has a degree of shade variation from tile to tile, characterised by a light to random finish to the surface.

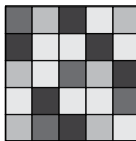

Light V1

Moderate V2

High V3

Random V4
